TOUCH 'N GO TERMINAL

The Touch 'n Go System (TNG) function as entry and exit without taking any ticket or card for parking. This system will be using the customer's Touch 'n Go card and the customer scans their card for entering or exit the parking. After the customer touches their TNG card, the TNG System will send a signal to open the lane barrier and allow the vehicle to pass through. TNG Terminals are usually located at entry and exit lane areas. This TNG System also has a server to record all transactions made.

FEATURES

- Support any type of Touch 'n Go card.
- Support Visa PayWave, MasterCard PayPass, MYDEBIT, and AMEX.
- The entry or exit transaction will be recorded.
- Enable to generate and view reports.
- Adding Touch 'n Go, Visa PayWave, MasterCard PayPass, MYDEBIT, and AMEX transaction capability will give customers added flexibility and speed in making parking payments.
- Will allow for a better flow since it allows the customer to bypass the payment
